Dr. Michael P. Martin is an Professor of Biology at John Carroll University, a Jesuit college in Cleveland, OH. His primary job is undergraduate education and he teaches courses that include Introductory Biology, Biotechnology Laboratory, and Molecular Cell Biology. Mike's research interests include protein-DNA interactions in the process of transcription and classification of cyanobacteria according to rRNA secondary structure and the unprocessed rRNA precursor. He also developed an undergraduate laboratory exercise to determine human ABO blood type by noninvasive methods.
